

Coalition Control

Coalition Control is the online account home for all Coalition insurance policyholders and it comes with enterprise-grade cybersecurity features to manage and lower risk. A powerful, limited version is also available for free to any organization at control.coalitioninc.com >

Attack Surface Monitoring (ASM)

Maintain security hygiene with continuous attack surface monitoring for all public IT assets in your organization.

Personalized Security Recommendations

Get detailed security recommendations for every identified risk to enable rapid remediation of vulnerabilities.

Security + IT Collaboration

Invite technical team members to view security information and receive alerts for your organization.

Third-Party Risk Management

Monitor suppliers and vendors for risks on their attack surfaces that may pose a threat to your organization.

Security Notifications

Get dashboard and email notifications of all critical vulnerabilities discovered on your organization's attack surface.

Cybersecurity Partner Savings

Save on vetted cybersecurity solutions from Coalition's partners for a true defense-in-depth security strategy.*

**Exclusive to Coalition policyholders.*

Active monitoring and personalized alerts to keep your business safe

Whether you are a business leader, a risk professional, or technical user, Coalition Control helps you improve or maintain good security posture across your entire organization.

Business Leader

- Gain additional visibility into your infrastructure and attack surface
- Invite internal and external members of your security and/or IT teams to use ASM and to follow security recommendations
- See your risk easily with intuitive graphs and data visualizations

Security User

- Monitor your attack surface with deep scans of all IP addresses, domains, assets, and ports
- Get alerts on newly-discovered vulnerabilities, including on specific zero-day threats as recommended by Coalition's threat analysts
- Get specific remediation recommendations based on vulnerabilities found on your organization's attack surface

Risk Professional

- Exclusive savings from leading cybersecurity vendors including SentinelOne, Okta, and Malwarebytes
- Get ongoing monitoring for lower risk and less likelihood of loss to your organization
- Monitor third parties beyond your own attack surface to identify supply chain risks before they become threats
- Find your organization's credentials that are exposed on the dark web
- Track security hygiene over time with data visualizations and tables

IT User

- See the correlation between security vulnerabilities and their exact location(s) on your infrastructure for rapid remediation
- Use easy-to-follow recommendations that are specific to your organization's attack surface to remediate and lower risk

Technical Features

Attack surface monitoring (ASM) is built into Coalition Control. The BUSINESS+ features are included with any Coalition insurance policy and include increased scan depth and frequency, and additional third-party risk monitors.

	FREE	ASM BUSINESS+ \$999/mo (FREE w/ policy!)	DESCRIPTION
Coalition Risk Assessment	✓	✓	Get a comprehensive, downloadable report updated with each scan.
Assets	✓	✓	Get a full list of public internet facing assets associated with your company.
Technologies	✓	✓	See what technologies are running on discovered assets (e.g. vendors, services, and applications).
Vulnerabilities	✓	✓	Get a full list of security risks and vulnerabilities (including Common Vulnerabilities & Exposures (CVE)) associated with your assets.
Data Breaches	✓	✓	See if your company employees have had their credentials or information exposed in a public data breach.
Torrents		✓	Identify torrents that have been downloaded to your network that may be potential malware vectors.
Honeypots		✓	Discover if an asset has been compromised and being used for threat actor activity.
Lookalikes		✓	See if your brand is being encroached on or if similar domains could be impersonating yours.
Keywords		✓	Search keywords on open fileshares, databases or paste bins. Find out if any sensitive company information has been shared on the web.
API Access		✓	Get access to the API for custom implementations.
My Company Frequency	1x / 3 mos.	Multiple scans / mo.	How often Coalition scans your assets for changes and new vulnerabilities.
My Company Ports	250	65,535	Scans of every available port on your public infrastructure.
Notifications		Web, Email, API (coming soon)	How you receive new notifications for discoveries and alerts.

Security Partners

Coalition insurance policyholders receive exclusive savings on leading cybersecurity solutions from vetted companies offering world-class technology. Whether your organization needs to secure identities, email accounts, or endpoints, Coalition's cybersecurity partners make it easy to adopt a defense-in-depth security strategy both quickly and confidently. Sign up directly for these offers inside Coalition Control.

Okta

IDENTITY & ACCESS MANAGEMENT

Okta is the leading independent identity provider. The Okta Identity Cloud enables organizations to securely connect the right people to the right technologies at the right time.

SentinelOne®

ENDPOINT DETECTION & RESPONSE

SentinelOne Singularity, which is a combination of endpoint protection and endpoint detection and response, provides next-gen prevention and EDR capabilities in a single Sentinel agent to achieve autonomous protection at machine speed.

Malwarebytes®

ENDPOINT DETECTION & RESPONSE

Malwarebytes endpoint detection and response detects and thoroughly isolates malware threats, provides a 72-hour ransomware rollback capabilities, and thoroughly remediates any damage.

Twingate

REMOTE ACCESS CONTROL

Twingate is a remote access security solution that enables organizations to rapidly implement a modern "identity-first" zero trust network. More secure and maintainable than VPNs, Twingate's simplicity makes it a great solution for businesses of all sizes.

Curricula

SECURITY TRAINING

Curricula's security awareness program delivers a series of short episodes throughout the year to train your employees how to defend against today's most common security threats. This includes episodes on topics including phishing, passwords, ransomware, social engineering, and more.

hackerone

PENETRATION TESTING

HackerOne Response establishes a vulnerability disclosure policy (VDP) by creating the workflows, documentation, and communications channels to engage the ethical hacking community in ongoing bug bounty and penetration testing of your organization.

RECIPROCITY

GOVERNANCE, RISK & COMPLIANCE

Reciprocity simplifies audit and compliance management with complete views of control environments, easy access to information necessary for program evaluation, and continual compliance monitoring to address critical tasks at any time.

Armorblox

EMAIL SECURITY

With support for Microsoft 365, Exchange, and Google Workspace, Armorblox stops targeted email attacks like BEC, spear phishing, CEO and vendor fraud, credential phishing, extortion, and other threats that get past native email security to steal money and data.

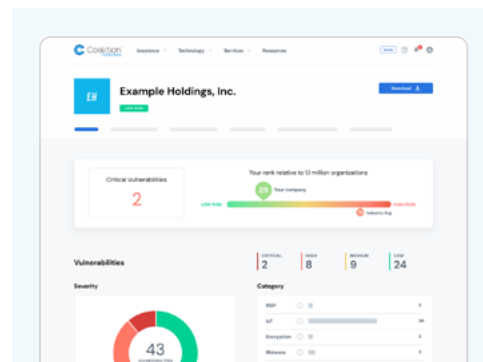

Active support before, during, and after security incidents

BEFORE

Active monitoring and alerts

Coalition Control offers enterprise-grade alerting and monitoring, free to all Coalition policyholders.

- **Attack Surface Monitoring**
Get attack surface monitoring, alerting, and personalized security recommendations across all of your organization's domains.
- **Third-Party Risk Management**
Put third-party vendors, suppliers, and partners on your Watchlist monitoring and receive alerts on their critical vulnerabilities.
- **Security Savings**
Save on leading cybersecurity solutions from SentinelOne, Okta, Malwarebytes, Curricula, and more.

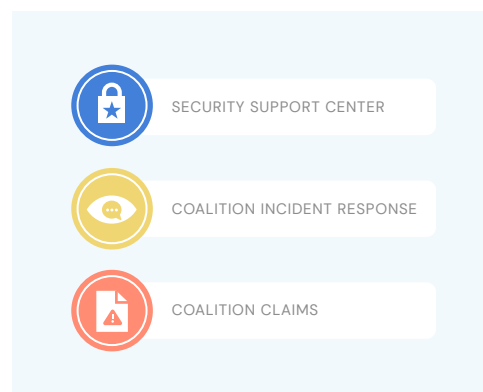

DURING

Active response during security incidents

Coalition is the only cyber insurance team provider with dedicated, in-house support, incident response, and cyber claims teams

- **Security Support Center**
Our Security Support Center is available to help policyholders understand their cyber vulnerabilities and remediation options when responding to critical alerts.
- **Coalition Incident Response (CIR) Team**
Our in-house staff of incident responders, forensic specialists, and security engineers respond in minutes, not days, to help you recover from network intrusions, ransomware, and business interruptions.
- **Coalition Claims**
Our expert claims team includes privacy attorneys & breach coaches who can help you navigate the recovery process — including clawing back lost funds, managing vendors and law enforcement, and ensuring your claim is paid quickly.

AFTER

Comprehensive insurance to help you recover quickly

Coalition's comprehensive insurance policy will help your organization recover financially and operationally so you can get back to business.

- **Protect the value of your entire business**
We don't just protect your network, our insurance policy protects your entire business with coverage for financial losses and liability arising from cyber incidents, technology failures, and privacy violations.
- **Insurance you can depend on**
Coalition's insurance products are offered with the financial security of many of the world's leading (re)insurers including Swiss Re Corporate Solutions, Arch Insurance, and Lloyd's of London, among others.

Please read your bound policy for all purchased coverages, terms, and conditions.
